TECHNICAL SKILLS

→ Front End

Javascript ES6+, TypeScript, React.js, Preact.js, Redux, Redux toolkit, HTML, SCSS, Styled Components, CSS

→ Back End

Node.js, Express, MySQL, MongoDB, PostgreSQL, PG, Mongoose.js, Sequelize, Amazon Web Services

→ AI Experience

Codex Ai, Oracle Code Assist, Cline

EDUCATION

Hack Reactor San Francisco

2019

Advanced Software Engineering
Immersive Program

Utah Valley University

Complete Course

In Technologies,

2015 - 2018

EXPERIENCE

2022 - present

ORACLE

SENIOR INFRASTRUCTURE ENGINEER

- **NOTE - CODEX AI WAS USED TO GREAT EFFECT TO GET MORE WORK DONE FASTER AT EVERY LEVEL OF THE ENGINEERING PROCESS.**

- Led frontend development of various user experiences within Oracle's Access Governance product utilizing **Preact(Minified React), Ojet component library, and Ojet styling.**
 - ❖ This involved communicating with team members across the world
 - ❖ Breaking larger more complex tasks into smaller workable tasks
 - ❖ Ensuring quality code throughout this whole process
 - ❖ Using **Codex, Cline and Oracle Code Assist AI** to ensure efficient and refined code is delivered at the highest possible quality.
- Spearheaded the development of dynamic data visualizations (graphs) for Access Review Insights, leveraging machine learning data to empower users with actionable insights for access decisions.
- Led the frontend implementation of the '**Manage Organizations**' page, translating UX designs into a user-friendly interface for creating and managing organizations and their members.
- Took over the frontend implementation of overall security permissions check across our various pages to ensure that no unauthorized access was given to those without the correct permissions.
 - ❖ Adding permission checks at all the different landing pages that we have across our app (Over 10 landing pages)
 - ❖ Create a new landing page for those who did not have access.
- Ensured that overall list item selection usability improvements were cascaded throughout our application. This included
 - ❖ Updating over 7 different creation workflows in our application to use a new improved selection criteria component.
 - ❖ Creating different component layers for each place in our application to be able to use the reusable component seamlessly.
- Championed and implemented comprehensive unit and Cypress testing strategies, ensuring application stability and achieving over 80% test coverage.

LIVEAUCTIONEERS

2021 - 2022

Front End Software Developer

- Developed and implemented key user experiences across the LiveAuctioneer website using React, Typescript, Redux, and styled components. This includes redesigning the Item cards for auctions items and revamping the My items and For you page to be more concise and clean.
- Experience using React testing library to increase overall coverage on all of our code. Also used jest to mock out different scenarios so that we fully cover what the component is doing when it renders, is clicked, dragged, etc.
- Experience mentoring other engineers about various different topics such as testing, file structure, React/Redux concepts.
